## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, drawn to a body pillar, classified in class 296, subclass 193.06.
  - II. Claims 5-6, drawn to a steering column, classified in class 280, subclass 771.
  - III. Claims 8-9, drawn to a drive shaft, classified in class 180, subclass 57.
  - IV. Claim 10, drawn to an engine support, classified in class 180, subclass 291.
  - V. Claim 11, drawn to a steering wheel, classified in class 74, subclass 552.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of groups I-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions all operate in different parts of an automobile to effect different aspects of the vehicle.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Buser on 12/13/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3612

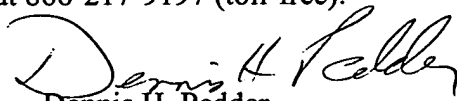

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
